

WEB SECURE ONLINE BACKUP SOLUTIONS

For your Servers, Desktops and Laptops

USE OUR POWERFUL ONLINE BACKUP SERVICES TO SAFEGUARD YOUR VALUABLE DATA

SERVICE HIGHLIGHTS

- Intuitive & user friendly interface works from within your browser!
- Backup workstations & servers
- Backup all kinds of data: Documents, emails, Exchange, SQL, etc
- Military strength (up to 448 bit) encryption of your data before it leaves your machine!
- Powerful Compression
- Intelligent backup of changed data only – after the first backup

Data is the lifeblood of your company!

43% of U.S. companies experiencing data disasters never re-open, and 29% close within 2 years. The loss of revenue for each hour of downtime varies from industry to industry.

Don't wait to find out your 'cost of downtime'!

You should ideally back up your data offsite, to a dedicated backup server that's managed 24/7 at a secure datacenter.

Our **Managed Online Backup Solutions** will help you get up and running after any Data Disaster.

OPERATING SYSTEM SUPPORT

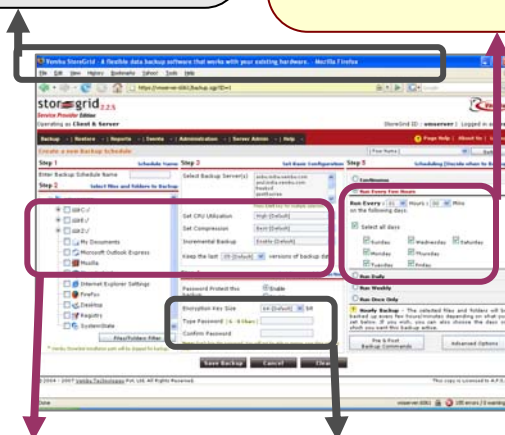

- Windows desktop (including Vista) & servers
- All common flavors of Linux
- Mac OS X 10.x
- FreeBSD 5.4 and above

SCHEDULE ANYTIME

Schedule your backups as required:

- Continuous
- Every Few Hours
- On particular days at particular times

Multiple Full Backups also supported

FEATURE PACKED DATA BACKUP

- Automatically detects changes in files and/or directories and backs up accordingly.
- Mobile(laptop)users' data can be backed up immediately as they connect to the LAN.
- Hot links provided for MyDocuments, Favourites, etc
- Incremental backups supported: backs up only changes in files and not the entire file every time. This saves bandwidth and time.
- Quick restore capability: end users can easily restore their data up to the file level.
- Easy & powerful backups for **MS Exchange Server, MS SQL Server & MySQL**

UNBREAKABLE SECURITY

- Powerful Encryption to prevent unauthorized access (even we can't access your files unless you provide the password).
- Up to 448 bit encryption based on the proven Blowfish algorithm.

Web Secure Online Data Backup Solutions

Data is at the core of your business. Your emails, customer records, documents, invoices – they're all data you can't do without! A data disaster can be crippling for a business, and the cost of downtime is typically in tens of thousands of dollars!

Backup irreplaceable data from your desktops, laptops and servers – with ABC Corp's Online Data Backup service. With state of the art software and robust infrastructure, we provide you an enterprise class online backup service that ensures that you can quickly get up and running after any kind of data disaster!

Why Backup Online	Service Highlights	How it works
<ul style="list-style-type: none">• Online backups are the easiest and surest way to protect your data.• Backing up to an offsite server ensures that you can recover your data even in case of a physical disaster, theft or loss.• Online backups also eliminate many of the error prone steps associated with traditional backup methods like tape. Users can restore 'point in time' versions of files without loading tapes one after the other.• With our online backup solution, your data is encrypted and compressed even before it leaves your computers.• After the first full backup, only incremental block level changes are sent – optimizing bandwidth & storage usage	<ul style="list-style-type: none">• Intuitive & user friendly interface works from within your browser!• Backup workstations & servers• Backup all kinds of data: Documents, emails, Exchange, SQL, etc• Military strength (up to 448 bit) encryption of your data before it leaves your machine!• Powerful Compression• Intelligent backup of changed data only – after the first backup• Supports Windows, Linux, Mac OSX & FreeBSD• Multiple scheduling options including continuous data protection & multiple full backup scheduling• Point in time restores allow you to simply point on a version and click to restore	<p>We simply install an agent on each computer (workstation /server) that you wish to protect. After the initial configuration, backups happen automatically and we can monitor and manage the process remotely – without ever accessing your data!</p> <p>We could even implement a staged backup solution for you wherein you could back up to a local server and have that replicate to our remote server as insurance against disaster!</p> <p>Pricing depends on the number of installations and the amount of data stored. Accordingly, you will be billed monthly!</p> <p>Note: You are charged on compressed data storage; additionally, our intelligent incremental data feature backs up only changed blocks after the first backup</p>

**DON'T WAIT TO FIND YOUR COST OF DOWNTIME!
BACKUP YOUR DATA NOW!**
